PRODUCT FEATURES

Material: Compression-molded Polymer

Associated Fixture: 1185

DESCRIPTION

The 1185 Series Rough-In Section (RIS) is a compression-molded, glass-reinforced polymer, molded with integral junction box. The RIS may be pre-shipped to allow the installation of the pour part assembly without the need to have finished internal parts on-site. The RIS allows for electrical conduit connection. Standard with two 3/4" NPT bottom tapped holes. 3/4" NPT front, 3/4" NPT side and 3/4" NPT conduit entry holes optional.

The Rough-in section is suitable for direct burial in earth or poured concrete applications.
