

TREE RING MOUNT

The Tree Ring Mount (TRM) from Vista Architectural Lighting is a versatile mount that can hold a variety of fixtures to tree trunks with minimally invasive attachment to the tree. Available as a fixed mount or a "VistaGreen" automatic adjustment mount that allows for the growth of the tree. Available in three ring diameters, the TRM is designed to hold three or four fixtures at a time, and can accommodate tree trunk diameters from 12" to 22". Featured in the TRM is a heavy-walled die-cast aluminum junction box that serves as the anchoring point and provides water-tight electrical connections. The junction box mounts the fixtures, incorporates the adjustment and locking mechanics, and houses all electrical connections. Hub openings on the bottom allow for supply service connection. The hub is tapped ½" NPT. The mount is available in 18 standard colors.

PRODUCT ADVANTAGES

- » 24" (Tree Diameter Range: 8" - 12")
27" (Tree Diameter Range: 10" - 14")
30" (Tree Diameter Range: 13" - 17")
- » Accommodates tree trunk diameters from 8" to 17"
- » Available in three or four fixture models
- » Fixtures can be oriented in all positions
- » Wet location (IP65) water-tightness rated
