

# STAINLESS STEEL / BRASS DOORS

## 1500 SERIES STEP LIGHTS

Stainless steel and brass doors are now available to enhance the look of all current 1500 Series Step Lights from Vista Architectural Lighting. Each door features heavy-walled .06" thick construction. Heat-strengthened glass is permanently affixed to each door with RTV silicon to further assure product integrity and watertightness. Options include four border or louver styles in three sizes, with horizontal or vertical mountings. These doors are the perfect complement to the stainless steel trim rings available for Vista Architectural Lighting's 1182, 1185 and 1188 In-Grade fixtures.

### SERIES ADVANTAGES

- » Heavy-walled .06" thick construction
- » #4 brush surface treatment
- » Four louver and border styles in three sizes
- » Horizontal or vertical mountings
- » Passivated stainless steel doors made from 304 alloy
- » Heat-strengthened glass permanently affixed with RTV silicon
