

SURFACE-MOUNTABLE EXTENDED ARM MOUNTS

Extended Arm Mounts from Vista Architectural Lighting provide a versatile, aesthetically pleasing solution for mounting many of Vista's Up & Accent lighting fixtures in building mounted applications. The extended arms can be combined with the WMB wall mount box for applications that require external transformers, ballasts, and LED drivers, or can be mounted directly over standard recessed 4-0 boxes with the WM-150R box cover where no external transformation component is required.

The Extended Arms are constructed from rugged, heavy walled 1" diameter aluminum tubing with CNC machined sleeved straight fittings to ensure solid mounting to the building. Die cast aluminum T-style fittings provide versatility for multiple fixture mountings. The fixture end is a female threaded 1/2" NPT opening. The Extended Arms are offered in straight extensions, T-style double extensions, 90° swept extensions, reverse 45° extensions, or 180° swept extensions. Custom lengths are available.

PRODUCT ADVANTAGES

- » Rugged aluminum construction
- » Available in a variety of configurations
- » Can be combined with WMB to house external transformers / ballasts / LED drivers
- » Minimalistic styling
- » Custom lengths are available
- » Can be used with a wide offering of Vista Up & Accent fixtures
- » Available in 18 standard colors
- » Made in the USA

« EAM-Straight

« EAM-90

≈ EAM-Reverse 45

« EAM-Straight T

« EAM-180
